Federal Lands Highway Program (FLHP)

Improving transportation to and within federal and tribal lands

District of Columbia FLHP

DC FLHP road miles: **59**
Funding Authorized FY 98 – 07:
\$52,060,000
Federal land acreage as percentage
of total DC area: **7%***
DC population: **581,530**

 **National Park Service (33 units)**

* This percentage includes Federal lands that are not part
of the FLHP core program and not depicted on the map.

**The Federal Lands Highway Program in
the District of Columbia.** In January 2003,
the National Capital Planning Commission
(NCPC) requested that Eastern Federal
Lands (EFL) manage the design and
reconstruction of the streetscape of, and
security improvements to, Pennsylvania
Avenue in front of the White House, which
had been closed since the Oklahoma City
bombings in 1995. EFL completed the
design and construction of the extremely
complex project before the Presidential
Inauguration in January 2005, restoring
Pennsylvania Avenue to the visibility,
international significance, and symbolic
importance the White House and its
environs deserve.

To meet the challenge of designing
and constructing a secure and beautiful
streetscape, it took a dedicated team of
environmental, architectural, highway,
landscape, construction, and financial
experts. Stakeholders included NCPC,

the National Park Service, the U.S. Secret
Service, the Commission of Fine Arts, the
Smithsonian Institution, the White House,
the U.S. Department of the Treasury,
the District of Columbia Department of
Transportation, and the General Services
Administration. Effective project
management, partnering, technology,
and innovative contracting played
important roles to satisfy aesthetics and
security requirements, as well as timely
completion of design and construction.
